

Editor: **Mrs Hazel McGee**

Papers Secretary: **Nick James**

The *Journal* is published six times per year, in February, April, June, August, October & December.

Library subscription (UK and surface mail overseas): £50.00. To purchase single copies or individual articles please see www.britastro.org/journal.

The Association is not responsible for individual opinions expressed in articles, letters, reviews or reports of any kind. Material published in the *Journal* does not necessarily express the views of the Council.

Contributions

Papers should be sent by e-mail (preferred) or by post (**three** copies) to the **Papers Secretary** at the address shown inside the back cover of each issue. They will be refereed, and, if approved by Council, published as soon as reasonably possible. Those wishing to speak at a meeting should contact the Meetings Secretary.

All other contributions should be sent to the Editor. As well as *Letters to the Editor*, she will be pleased to receive contributions to *Observers' Forum*, particularly interesting astronomical photographs, drawings and images. Colour images are especially welcomed. Photos and media will be returned only if a suitable stamped addressed envelope is enclosed.

Advertisements

Small advertisements should be sent to the Office, accompanied by the appropriate remittance. Members' small advertisements are FREE and may be sent directly to the Editor by e-mail.

Display advertisements and loose inserts: For a rate card and further information, contact Mrs Ann Davies, 11 Sedgefield Rd., Greenham, Newbury, Berks. RG14 7TZ. Tel. 01635 30598. E-mail anndavies@dsl.pipex.com.

Deadline

All material, including short letters and notes, must be received by the Editor by the following dates:

Issue	Date
2011 August	2011 June 25
2011 October	2011 August 31

Later dates apply, by arrangement, to electronic advertising copy for which space has been reserved.

Peter Carson imaged the Crescent Nebula, NGC 6888, using a Tele Vue NP101 f/5.4 refractor. The image is a combination of 80min H-alpha obtained from his home observatory in Leigh-on-Sea, Essex and 30min each RGB from Kelling Heath, Norfolk. See article on p.174.
