

BAAVSS Cataclysmic and Eruptive Variable Star Programme

Observers are advised to report full estimates using the latest charts. Such information can be used during analyses, or if the sequence is revised at a later date. The number in the chart column is the sequence date code.

If a BAAVSS chart is not available, use the AAVSO plotter to create your own chart, and please quote the unique number of the chart when reporting observations.

Paper copies of VSS charts are available from the chart secretary.

Star data is taken from the AAVSO VSX
