SCIENTIFIC IMAGING SYSTEMS

Terry Platt

March 1946 - June 2025

It is with heavy hearts that we share the sad news that our beloved co-owner and friend, Terry Platt, passed away on Tuesday 17th June, following a sudden, short illness.

Terry wasn't just a leader in our company and our industry; he was a huge part of what made Starlight Xpress so successful. His brilliant mind and attention to detail allowed him to design some of the most innovative products on the market.

If you ever had the fortunate chance to meet or work with Terry, you'll know how deeply he cared, not just about the business, but about the people behind every relationship, every product, and every email he received. For Terry, answering emails at 10pm on a Sunday evening was part of who he was.

For those of us who worked alongside Terry for so many years, this is a tremendous loss that is difficult to convey, both personally and professionally. And for those of you who have supported our business, please know how much he valued and appreciated each of you.

While this is a difficult time for us, we are committed to continuing the amazing work that Terry was so passionate about. We will strive to carry forward his legacy with the same values, dedication, and care that he instilled in all of us.

Thank you for being a part of our journey.
Your continued support means more now
than ever.

Warmly,

Michael Hattey
