T CrB M3III spectrum subtracted

2025-08-09

2024-03-23
continuum match
not as good

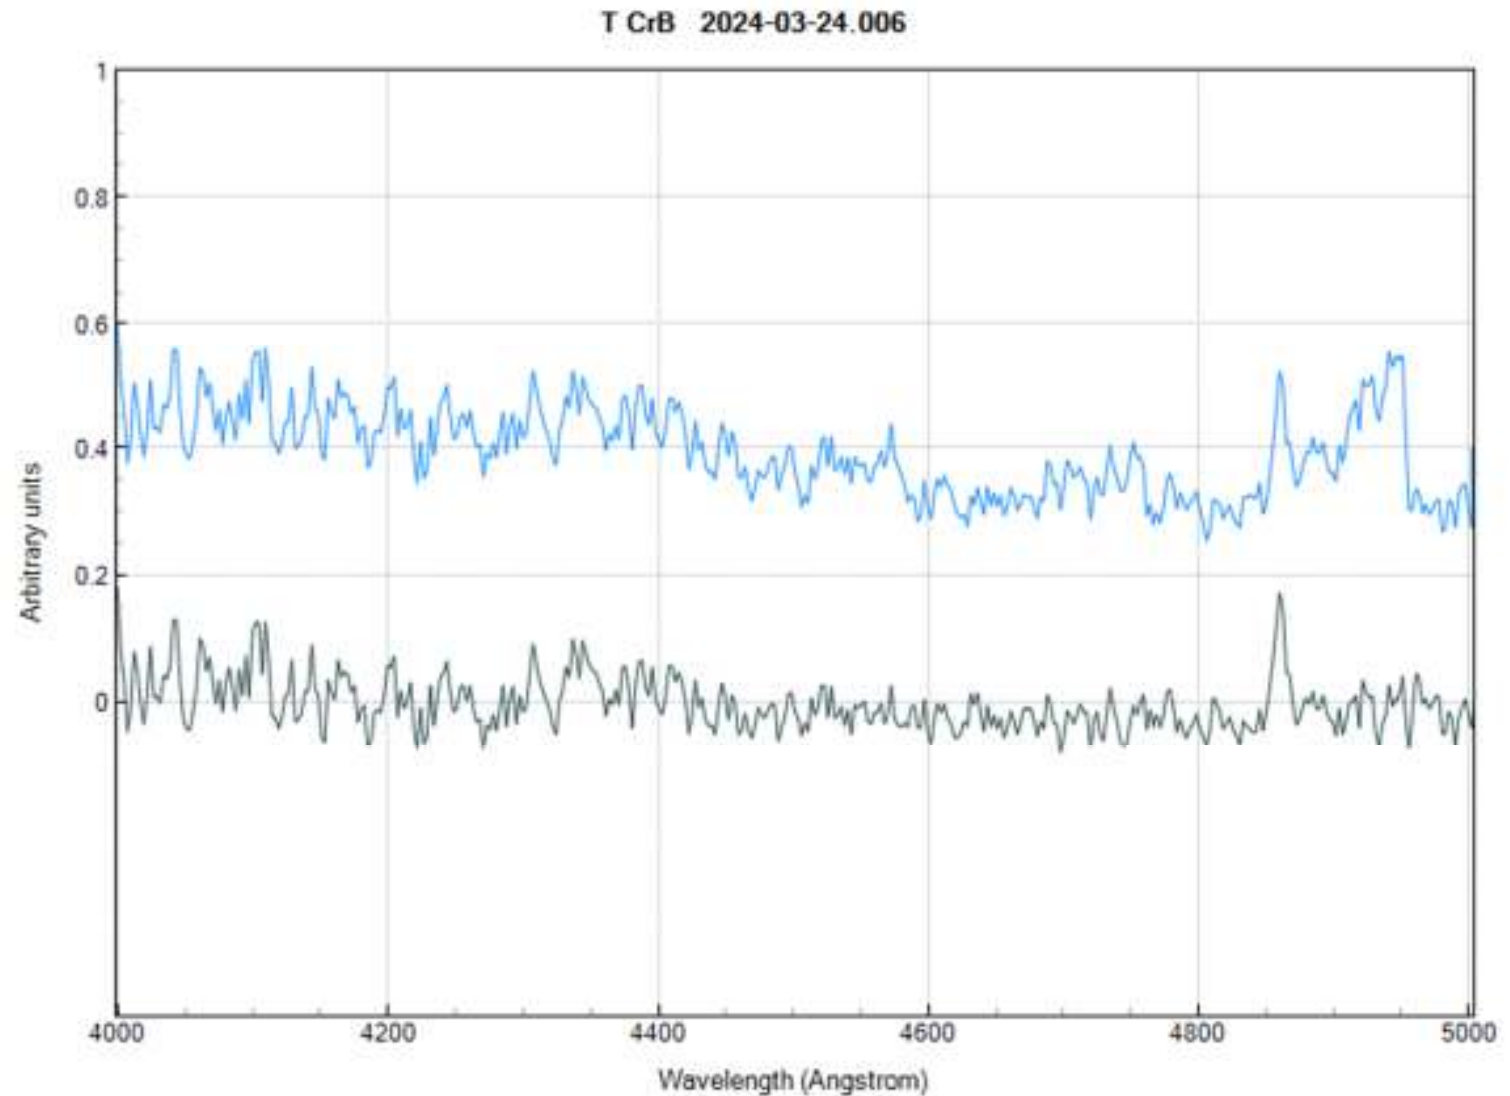

M3III a good fit to molecular band depth

In low state M4III is a better fit, particularly in the red

M3III
poor match

M4III
good match

Has the red giant changed from M4III to M3III
or is there something else going on here?
